Subject: State Preparedness Cooperative Agreement Expenditures / State Smallpox Vaccination Program Status

Earlier this month ASTHO conducted a survey of the nation's state and territorial health agencies to develop current information on: (a) the status of CDC and HRSA cooperative agreement funds expenditures; and (b) the status of the states' smallpox vaccination program efforts. Forty-eight of the 50 states responded. We want to thank each of you for your active participation.

Attached are the final survey results, in both graphic and tabular form, that will be released this evening. These same materials will be available on the ASTHO website, www.astho.org, in the next few days. Attached are:

1. A Word document outlining the key survey findings and caveats;
2. A Power Point graphic showing the consolidated status of CDC and HRSA cooperative agreement expenditures as of the end of the cooperative agreement project period (August 31, 2003);
3. An Excel spreadsheet with a state-specific table of the CDC and HRSA Cooperative Agreement expenditures status as of August 31, 2003; and
4. An Excel spreadsheet with:
 - a. a table showing the current status of state-specific pre-event smallpox vaccination programs (Tab 1);
 - b. a composite picture of the states' current abilities to vaccinate their entire populations within ten days (Tab 2); and
 - c. a table identifying states that have developed their own specific smallpox preparedness metrics/indicators (Tab 3).

We hope this information will be of use. If you have any questions, please let us know. Best regards.

George
